Clarisights _ SRE

"Architecting Tomorrow: Lead SRE Role for Innovative Infrastructure at Clarisights"

About:

Product Startup Established 2018

Self-service reporting platform for data-driven marketing teams.

1. Cutting-Edge Technology: Clarisights offers an advanced SaaS marketing intelligence platform that empowers performance marketing and growth teams. Candidates can be part of a team that's at the forefront of technological innovation in the marketing industry.

2. Impactful Mission: Join a company that is on a mission to provide marketing teams with the "superhero powers" they've always wanted. Clarisights is dedicated to revolutionizing the way marketers analyze and utilize data to make impactful decisions.

3. Streamlined Data Analysis: Candidates can contribute to the development of a platform that eliminates the need for outdated spreadsheets and BI platforms. By enabling marketers to independently explore and analyze data in one intuitive interface, Clarisights enhances efficiency and productivity.

4. Global Impact: Be a part of a global community of marketing professionals who rely on Clarisights to optimize their performance marketing workflow. Collaborate in real-time with teammates from around the world.

5. Visualization and Insights: Work on creating powerful visualizations that help marketing teams answer critical questions about their campaigns, such as identifying top traffic sources, optimizing costs, and maximizing return on investment.

6. Innovative Problem-Solving: Contribute to solving complex challenges in the marketing domain by developing solutions that allow marketers to quickly drill down into granular details and extract valuable insights.

7. Funding and Growth: Clarisights has received significant investment, including a $14 million seed round led by Sequoia Capital India. Join a company that is well-funded and has ambitious plans for expansion, including growing the go-to-market and customer success teams.

8. Collaborative Environment: Become part of a collaborative work environment where teams integrate data channels, create and optimize dashboards, and work together in real time to achieve marketing success.

9. Professional Development: Candidates can expect opportunities for skill development and growth as they contribute to a high-impact SaaS startup that is disrupting the marketing intelligence landscape.

10. Influential Network: Benefit from the guidance and support of influential angel investors and venture capital firms like Guillaume Cabane, Zach Coelius, Max Altschuler, Connor Murphy, Jens Lapinski, and Sequoia Capital India.

Job Description:

SRE

Mandatory Skills: We prefer candidates who excel in Linux and have strong knowledge of CS fundamentals. Additionally, a wide range of exposure to various activities is valued.

Although some minor troubleshooting may be involved, the focus is primarily on deployment and developing new solutions.

The ideal candidate should possess analytical skills to determine how and where to run solutions. Occasional deployments, typically occurring every month or two, will be expected.

The primary responsibility involves being part of a highly technical team, assisting in-house development, and collaborating with cross-functional teams.

Culture is the freedom candidates have rooms to solve problems in their own way and contribute ideas in a flexible and collaborative environment.

Reporting to the CTO, the structure is flat, and the ability to program is a plus. Clarisights is an excellent platform for learning and collaboration.

Interview Rounds:

1. Culture Fitment Round: This round focuses on assessing the candidate's motivation, problem-solving skills, and alignment with Clarisights' values. Candidates should demonstrate a genuine interest in Clarisights and ask questions about the company's growth and opportunities.
2. Tech Round: There are two rounds in this phase, each lasting approximately 1.5 hours, totaling 3 hours. The first round explores the candidate's previous experience, while the second round tests their CS fundamentals.

Package - Upto 90LPA

Location : work from office in Bangalore (Domlur)

Kindly answer the following questions for us to understand your technical background and expertise (This helps us with sharing detailed information on your candidature with Clarisights)

1. Can you discuss your experience building and leading large-scale distributed systems from scratch?
2. How do you approach designing effective software deployment pipelines?
3. Share projects involving big data technologies like Spark, Flink, Hadoop, or Kafka that you've worked on.
4. Explain your understanding of Von Neumann architecture and optimizing system performance.
5. Describe how you've navigated complexity in large codebases and improved them.
6. How have you utilized Kubernetes and Docker for container orchestration?
7. Talk about your Linux OS knowledge and hands-on experience.
8. When do you prefer PostgreSQL over MySQL or vice versa? Provide a relevant example.
9. Explain your approach to integrating security best practices into software systems.
10. How do you handle ambiguity and uncertainty when working with existing systems?
11. Give an example of a resource-constrained problem you creatively solved.
12. Share instances where you quickly adapted and learned in a fast-moving environment.
13. Describe your experience with quick prototyping and building Proof of Concept systems.
